Some business men are wearing long faces because the railroads have laid up for repairs.

The total is staggering, at first glance. But the importance of everything is only by compar, son. The railroads own over two and a quarter million freight cars. The actual situstion is that, out of every 23 cars. 38 are being used constantly and only five are idie. That's not so bad.

Farmers are buying more than in 1923. From the first of the year to June 1, the two largest mail order houses-Sears-Roebuck and Montgomery-Ward-sold 154 million dol lars worth of goods, compared with 146 millions in the corresponding five months of last year.

Farm buying power right now is an especially good backlog for city industries. Common sense should induce the city man to do everything possible to keep that backlog in good shape. The prosperity of the city man depends considerably on the prosperity of the farmer.

Money isn't timed lately. That's one of the most encouraging things about the general business situation. In May 515 million dollars worth of new bonds and other recurries, were placed on the market. In Mar. surd. last year, less than half that much. Promoters with keen intainet, sense that the public has a strong undercorrent for confidence in the near; future. Otherwise, there'd be fewer new securities issued to finance buerpers expansion and new rentures.

We are creatures of the weather. Small nonder we talk about it so ! Retailers blame the later was shot by his wife. spring for the business recession. weather held back the sales of spring clothing and other seasonal commodities. That put a lot of makers out of work. The weather was like a dam, backing up dull business into many channels.

Why have heart failure because the iren and steel business has been so dull lately? In May, the output of pig iron dropped a lot. But at that. it was almost as much as in May of 1913, one of the best prewar banner !

The nation is gradually adjusting fixelf to peace-time production, after abnormal war-time activity.

It gives one a henduche to contemplate statistics about sales of gasoline The American people have been using a fourth more gasoline then a year ago. Sales are reported as over 600 million gallons a month for the whole country. This is especially interesting and important if you own good cil stocks.

This is typical of the history of

applied inventions.
You picture a future race with pothing to do except run machines. make them, mine and prepare over and grow food. These tasks can be made easier by machiners, but never displaced by it. There'll always be nients of work, though a one-hour workday may be the rule a long time "but we'll so to church if you insist." after "we're all dead and forgotten.

BLACK, THE MAN FROM TEXAS, AND HIS ATTITUDE ON FARMER AID BILL

"The fact that some of these high republican officials have betrayed their trust does not cause me to lose any of my confidence in our government, or in the general honesty and integrity of public officials. On the contrary the very fact that our democracy is able to purge itself of these unfaithful servants and fling them from office is proof positive that it still has that ife-giving vigor which has made our republic the greatest nation in the world. I am not one of those who believe that the world is growing worse. I believe that it is growing

Who said it? Eugene Black. Who is Engene Black? He is the democratic congressman from the First District of Texas, and he is considered by many who are able to give an opinion, one of the ablest and most fearless democrats from the south to the national capitol to make the laws. And yet Cyclone Davis came within four hundred votes of defeating Black two years ago, and there is a farmer-laborer candidate in the field against him this year. He is ever opposed to a protective tariff. He voted against the McNary Haugen bill, a measure he said "pretending to be a bill for the relief of the farmers." This excerpt is taken from his opening speech at Cooper.

"This bill seeks to set up a government corporation with a capital stock of two hundred million dollars paid out of the treasury of the United States for the principal purpose of buying wheat from our American producers and seiling the surplus abroad.

The plan he explained would have the effect of increasing the price of wheat in the United States to about \$1.50 a bushel. z definite part of an physical ex- with the surplus being sold in world markets for about \$1.00 a bushel, but he did not see how the masses of the American ary man unless he has a violin in his people were to benefit by a scheme which would increase so greatly the cost of wheat, flour, bran and corn, for corn would naturally rise in price with the price of wheat. Then he asked:

"What kind of a representative would I be if I voted to create a government corporation with two hundred million dolreal skill—but the skill is absent un- lars capital stock paid with the tax payers' money, and by this arbitrary artificial method increase the price of flour, bran. corn and other feed stuffs one-half over what they are now and add this additional load to the already-over-burdened backs of the farmers in my district who have these things to buy! It can be done alright. You can tax the people of one part of the country and make them poor to put prosperity into the pockets of another part of the country but it is unjust and unfair and indefensible, and I will not be a party to it. My judgment is that it is the duty of the government to provide financial facili- When the air pazz commences then ties so that orderly marketing can be properly financed and then let the farmers themselves market their own crops through their own organizations without being supervised and wetnursed by a government agent from Washington.

Gongressman Black represents an agricultural district. 80 per cent of the voters of his district are farmers. He is a Texas law | She maker who never panders to the demands of organized bloc. Politicians say that the farm labor party is very strong in the first congressional district, but Black doesn't sidestep or dodge. He sticks to his text. He is opposed to governmental price fixminates the worn out or damaged lings of the product of the farm or the products of industrial. The concerns or organizations. He holds that the government has ne constitutional right, no moral right, to use its taxing power for the purpose of holding up fortunes or tearing them down. She

Two years ago he refused to accept the demands of the bloc are in good repair and ready for need in his district. This year he harls his defiance in the teeth of and about 150,000 other cars that are the champions of the McNary-Haugen bill or any other bill Har neighbors all west, as a most which pretends to be a measure for the relief of the farmers. His reasons are given as set forth in this news editorial and they are worth while, for the reason that many members of the Texas delegation have swallowed all the demands for so-called relief legislation made upon them, or else have hid out and discussed the flag, the tradition of the fathers, the ancient landmarks, the rise and fall of the Roman Empire and what happened to the Greeks in the long ago.

Hon. Eugene Black is back in Texas and the fur is flying in the first congressional district.

WHY HE CALLED

Senator W. A. Borah of Idaho paid a recent visit to the President "for the purpose of straightening out some reclamation matters." Congress," he said, "failed to authorize the construction of some new projects and to relieve those living on completed projects who have been unable to meet their payments to the government." COAST WOMAN CAN OPEN ANY DOOR

LOS ANGELES, June 18-Locks of the most intricate type hold no secrets for Miss Dorothy McKeown. Making keys for locked doors is Miss McKeown's profession. She is the master door opener of the Biltmore botel of this city, where thousands of keys are carried away annually in the pockets of the absent-minded

Dorothy makes an average of 500 keys a month for the hotel. There are no two locks in the building alike.

"I just love to work with locks," said Miss McKeown. "It's like working a puzzle, and puzzles have had a fascination for me. All you need is patience. No matter how intricate a lock may be. I know it has been devised by a human brain, and all you have to do is to let your own brain follow the lines of the one that made the lock."

Such Is Life

"Eighteen years ago I had three. ribs broken: fourteen years ago my right leg; eleven years ago I nearly went over with typhoid fever and since then have had awful stomach and liver trouble. Was filled with gas most all the time. I would have colic attacks so bad as to become unconscious. No medicine helped me and doctors advised an operation. One day talking with a stranger he recommended Mayr's Wonderful Remedy, which beloed me at once." It is a simple, harmless preparation that removes the catarrhal mucus from the intestinal tract and allays the inflammation which causes practically all stomach, liver and intestinal allments, including appendicitis.
